Claims 6, 7, 10 are rejoined by virtue of their dependence on allowable claim 1.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art, either alone or in combination, does not disclose or render obvious wherein said coupling device comprises: an electrowetting medium positioned between said waveguide and said photoluminescent medium; first and second electrodes; and a voltage source capable of applying an actuation voltage to said first and second electrodes effective to move said electrowetting medium between a first condition that permits transfer light of said first wavelength from said optical waveguide to said photoluminescent medium and a second condition in which light of said first wavelength remains confined in said waveguide in combination with the rest of claim 1.

It is noted that the claim 1 is allowable because the unique combination of each and every specific element stated in the claim.

The prior art, either alone or in combination, does not disclose or render obvious wherein said coupling device comprises: an electrowetting medium positioned between said 1st and 2nd electrodes, said electrowetting medium capable of being selectively optically coupled to said waveguide for receiving light of said 1st wavelength and emitting light of a 2nd wavelength in response to receiving light of said 1st wavelength; and voltage source electrically coupled with said 1st and 2nd electrodes, said voltage source capable of applying an actuation voltage to said first and second electrodes effective to move said electrowetting medium between a first condition that permits

transfer light of said first wavelength from said optical waveguide to said photoluminescent medium and a second condition in which light of said first wavelength remains confined in said waveguide in combination with the rest of claim 23.

It is noted that the claim 23 is allowable because the unique combination of each and every specific element stated in the claim.
